

**EVERY TEST HELPS  
US KEEP ON TOP OF  
THIS VIRUS**

The Department of Health and Human Services is working with communities to ensure testing rates stay high. Testing helps us track the spread of the virus and keeps our friends, families and communities safe.

**Please get tested if you have any symptoms, even if they are very mild.**

**Tests are free, and there are support payments available to help workers stay home if they need to isolate.**

Local testing sites:
